Meeting: **Aug 5, 11:00–12:00**
Counterpart: **Nao Uesaka**, Mizuho Securities
Status: **Draft for discussion** · v0.1

Entity Structure — Option A

OPTION A · TWO WRAPPERS

A financeable for-profit core beside a mission arm it cannot dilute. Two legal wrappers, one project: an operating company that carries the revenue assets Mizuho can finance, and a non-profit that owns the forest, the species choice, and the community mandate. **(See Option B for a three-wrapper variant that adds a member-owned cooperative supply layer.)**

STRUCTURE 二つの法人格

NON-PROFIT Mission arm

NPO法人 / 一般社団法人 — keeps mission control

Reforestation & community entity
Owns species choice, replanting, eco-tourism & MRV

more trees
Partner NGO — harvest→replant model

御杖村森林組合
Mitsue Kanko — plant, tend & process fuel

FOR-PROFIT Operating company

株式会社 / 合同会社 — the vehicle Mizuho can finance

Operating company (revenue assets)
Balance sheet & repayment capacity → debt, bonds, SLL, equity

Biomass CHP 熱電併給
Heat + power from thinnings

AI data center
Compute / PPA power sales

Harvest-funds-replant loop — operating surplus → mission arm (the more trees split), kept explicit so the for-profit side cannot starve the forest

HOW VALUE MOVES 資金の流れ

FLOW	MOVEMENT
Forest → fuel	Village thinnings (間伐材) are chipped and dried at the co-op's existing **牛峠工場** processing center (御杖村森林組合) — leaning on existing yard, crew and drying to keep net new capex low. A **fuel-grade chipper** (P31S–P45, <20% moisture) is the likely new item, targeted at a forestry/biomass subsidy and co-op-owned. *Chipper spec & drying moisture to confirm with the co-op.*
CHP → compute	Heat + power run the data center; surplus power can PPA to the onsen / village.
Revenue → mission	Operating surplus flows to the non-profit as the **harvest-funds-replant loop**.
Carbon (J-Credit)	Forest-sequestration credits sit in the **non-profit**; fuel-switch credits in the **operating company**; both monetized via the J-Credit market.
Subsidies 補助金	Each track routes to the entity it legally requires — **DC / power** (METI GX地域共創, MoE zero-emission) to the operating company; **forest / RE 交付金** and the **fuel-chipper grant** to the non-profit / co-op.
Mizuho finance	Bond / SLL / equity to the operating company; grant & impact advisory to the non-profit.

Draft for discussion — not a committed structure. Funding is pipeline / target; ¥0 committed as of 2026-07. Entity form (NPO / 一般社団 / KK / hybrid) open — confirm tax & subsidy eligibility with a Japanese 税理士 / 司法書士 before filing. 牛峠工場 chipper spec & drying unverified — confirm with 御杖村森林組合 (0745-95-2410).
