

Meeting Prep — Yuko Koshiba & Michael Goldberg (2026-08-13)

Who

- **Yuko Koshiba** — Philanthropy Advisors (PA-Inc), yuko.koshiba@pa-inc.jp. Met at Morgan Lewis Impact Investing conf (Jul 2026). Prior questions from her (2026-07-04): raise amount/vehicle, how many funders so far, offer to support 公益法人 (public-interest entity) application.
- **Michael Goldberg** — iww@gol.com, cc'd on the live more trees thread (Kishi/Miyazaki). Connection to Koshiba/how they know each other not confirmed in memory — clarify at start of meeting if unclear.

Your ask: advice on the setup

Frame this as a governance/structure advice session, not a funding ask. Useful angle: you have two competing diagram sets modeling **who talks to whom** (Village Gov ↔ more trees ↔ NGO ↔ Mitsue Kanko/forest group) and you want an outside read on which is more legible/credible to funders and partners.

Do the two diagram sets help her understand the idea? — Yes, use both, in this order

1. [mitsue_kanko_collaboration_diagrams_a3](#) (EN/JP) — the current default model: Village ↔ more trees ↔ NGO ↔ Mitsue Kanko chain, NGO as the hub. 4 panels: Legal/Governance, Money Flow, Labor/Work Flow, Overall Stakeholder Network. Best as the **primary leave-behind** — it's the structure you're actually running with.
2. [mitsue_kanko_forest_led_diagrams_a3](#) (EN/JP) — the alternative where Mitsue Kanko (forest group) is the coordination hub, NGO delegates ops rather than being bypassed. Useful as a **contrast slide** to prompt her advice: "here's the alternative we considered — which structure would you back as a philanthropy/governance advisor, and why?"

Showing both is exactly the kind of question a philanthropy advisor is well-placed to answer — entity legibility, liability, and fundability differ between an NGO-hub model and a forest-co-op-hub model. Print or screen-share the A3 PDFs ([mitsue_kanko_collaboration_diagrams_a3.pdf](#), [mitsue_kanko_forest_led_diagrams_a3.pdf](#)) since they're diagram-dense and won't read well at letter size.

Status to be accurate about (don't overstate)

- **Funding: ¥0 raised/committed**, including your own ¥6M founder layer. ¥192M is a target/pipeline figure only — say so explicitly if it comes up.
- **Entity structure: still open (Phase 0)**, per Takahisa's advice. Current lean is the 3-pillar option from the Mizuho meeting (NGO/DC-energy + more trees/forest + cooperative), but nothing is filed. This is the live question to bring to her — she previously offered to help with the 公益法人 application.
- **Forest-team collaboration is now CONFIRMED** (Kinjo-san, 2026-08-10) — this is new since your last exchange with Koshiba and worth mentioning as momentum.
- **more trees**: partnership direction agreed in principle (harvest-funds-replant split), Mitsue Kanko collaboration confirmed 2026-08-10. A reply is still owed to Kishi's thread (cc Goldberg) — you could mention you're closing that loop this week, since Goldberg is on that thread and may ask.

Suggested agenda

1. Recap where things stand: forest collaboration confirmed, entity structure still open, ¥0 committed.
2. Walk through **collaboration diagram** (governance/money/labor/network) — get her reaction to the NGO-hub structure.
3. Show **forest-led alternative** as contrast — ask which she'd advise for fundability / 公益法人 eligibility / partner trust.
4. Revisit her 3 questions: raise size/vehicle (still ¥30–50M, vehicle undecided), funder count (still effectively zero formally committed), and her offer to help with the 公益法人 application — decide if you want to take her up on it now that the entity question is closer to resolving.
5. Ask Goldberg directly what his interest/role is (more trees thread cc, unclear formal tie) so you know how to loop him into next steps (e.g., the more trees reply).

Files to have open/printed

- docs/meetings/mitsue_kanko_collaboration_diagrams_a3.pdf (+ `_jp` if needed)
- docs/meetings/mitsue_kanko_forest_led_diagrams_a3.pdf (+ `_jp` if needed)
