

Mitsue AI Data Center - Forest-Team-Led Model (Alternative)

Discussion draft - Mitsue Kanko as the operational hub for logging, replanting & processing

Working draft - v1.1 - 2026-08-08

Very early draft - concept only. Nothing here is decided or agreed. Starting point for discussion, not a proposal to sign.

What's different: Mitsue Kanko (8 crew) leads execution. Village Hall ↔ more trees ↔ NGO handles formal liaison; NGO delegates day-to-day coordination to Mitsue Kanko. NAIST stays direct.
