

Mitsue Forest Supply Chain - What We Currently Have

From forest owners to buyers and the future CHP / AI data center. Green = confirmed, grey dashed = unknown or unconfirmed, blue dashed = future.

Version: v1.2 | Last modified: 2026-10-09

Solid box = confirmed fact
 Dashed grey = unknown / unconfirmed
 Dashed blue = future (not built)
 Dashed arrow = unconfirmed or proposed

Open questions

- Village-owned forest (村有林)?** Asked 2026-08-05, no answer.
- Common-use land (財産区・入会)?** No Mitsue record; only Tenkawa confirmed.
- Where does wood go?** Yamaguchi to Misugi market; Tokuda to mills and Sakurai market (its own site); coop flows unverified.
- Who else is active?** 10+ independents (his estimate); 山本製材所 (神末) status unknown; Mie-side operators unverified.
- Does Tokuda cut inside Mitsue,** or mostly Mie and Sakurai? Asked Ohba-san 2026-10-09 (awaiting reply).
- How are operators chosen** for village-funded thinning and 村有林? Asked 2026-10-09.
- Owners:** any group or owner-intent survey results? Coop member count and forest area? Asked 2026-10-09.
- Coop finances:** no document seen; "coop in trouble" is a hypothesis only.
- Onsen wood:** which grades and volumes, and from whom besides the coop?
- B-grade destination** (plywood buyer or CHP fuel) sets real CHP fuel volume.
- Proposals to test with the coop:** open-gate yard, shared harvester and who owns it.
