

Mitsue Project — Phases & Funding Flowchart

Diagram 1 — Phase Spine with Funding Gates

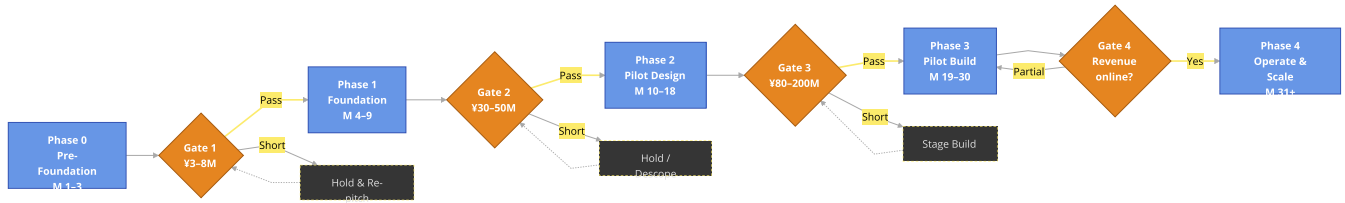

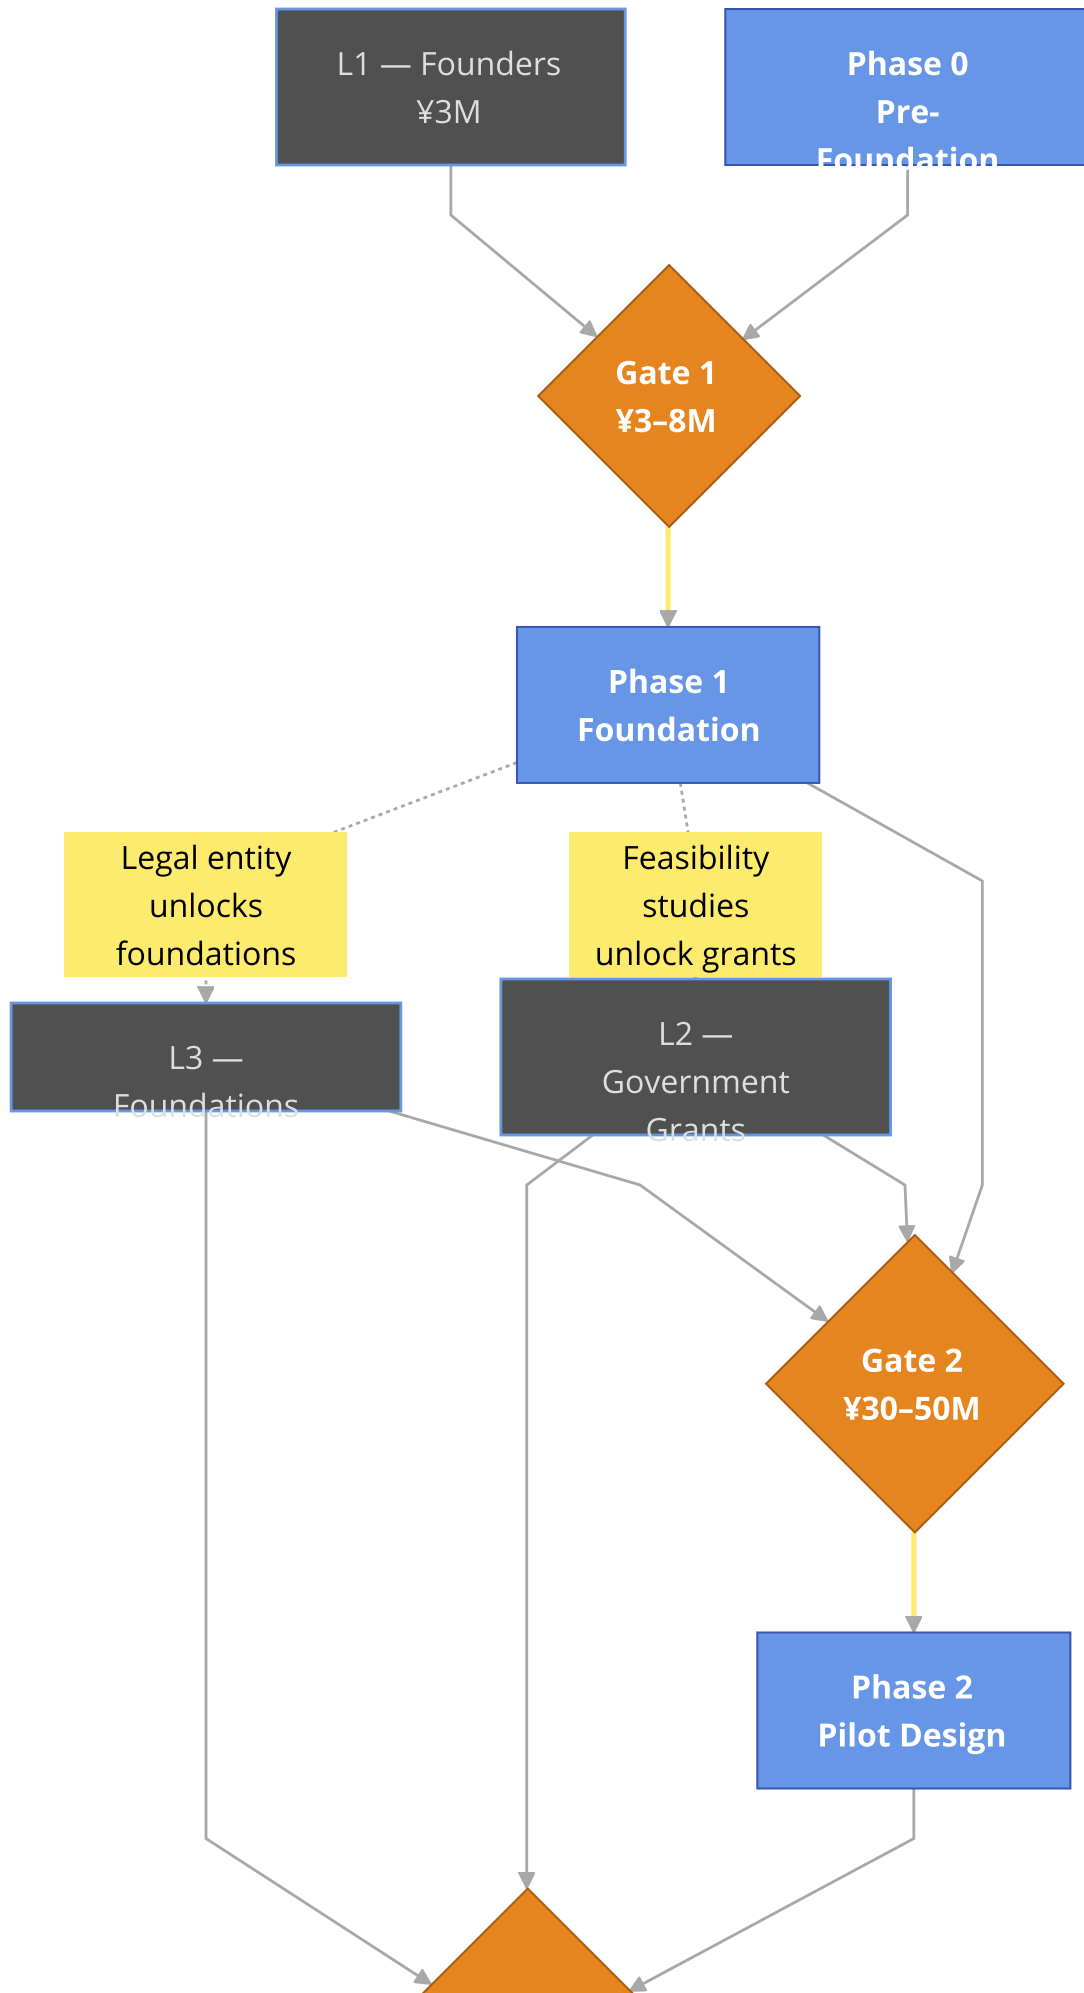

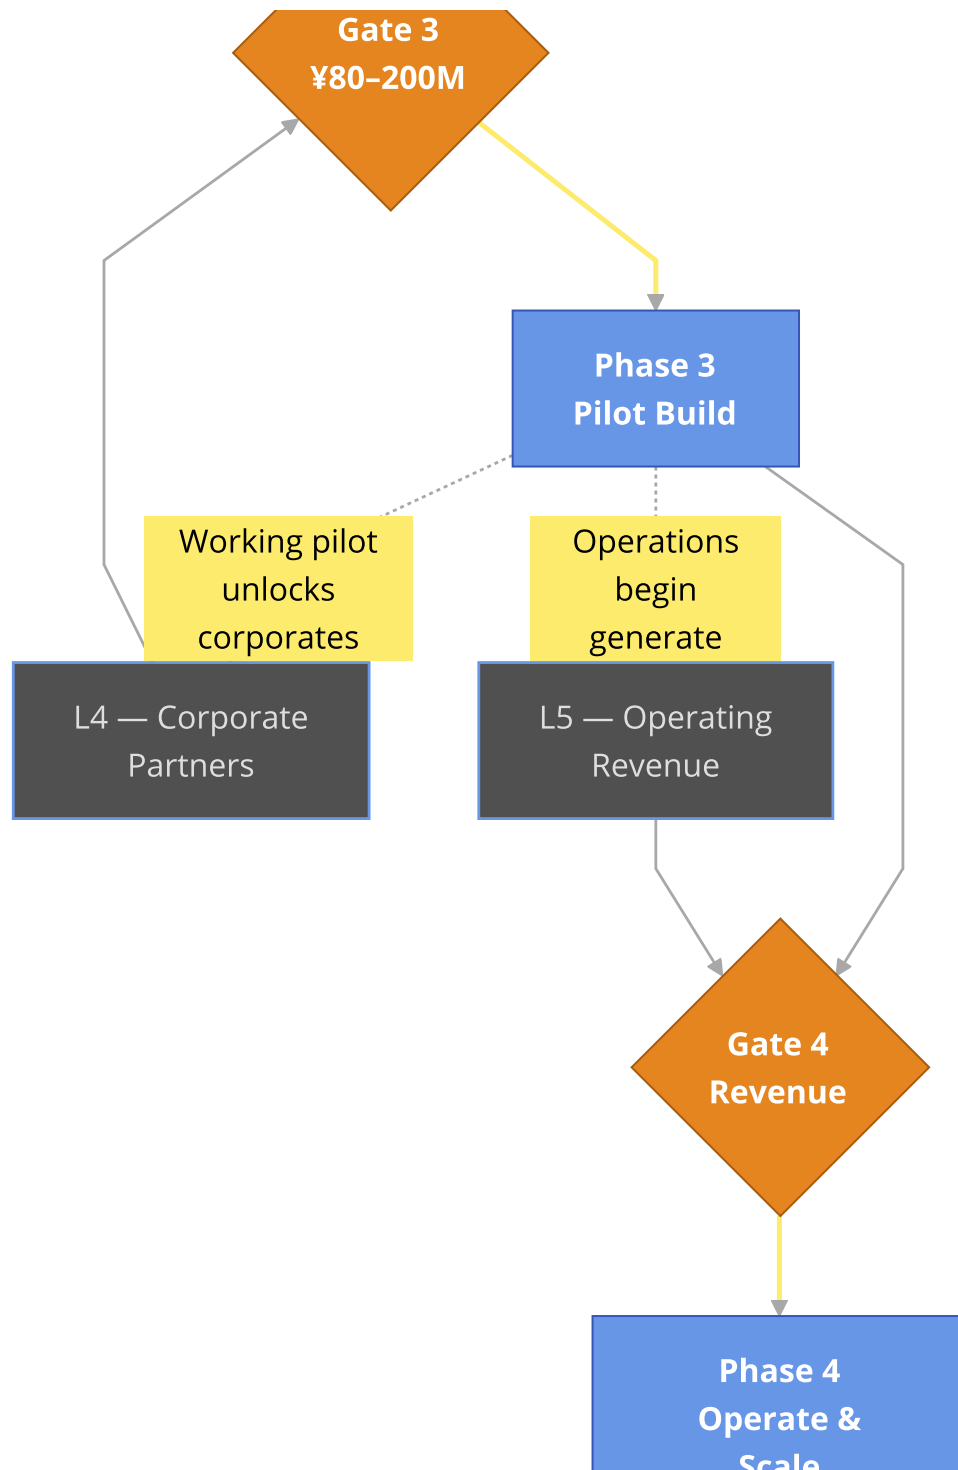

Diagram 2 — Funding Sources Feeding Each Gate

Legend

Shape / Colour	Meaning
Light-blue box (#6796e6)	Project phase — what gets done
Orange diamond (#e58520)	Funding gate — checkpoint between phases
Slate box, light-blue border (#505050 / #6796e6)	Funding source / layer

Shape / Colour	Meaning
Dark dashed box, yellow border	Hold or descope action when a gate fails
Solid arrow	Sequential flow / funding inflow
Dotted arrow	Feedback loop — phase deliverables unlock the next funding layer

How to read it

1. **Read the top row left-to-right** — that is the project's forward path through the five phases.
2. **Yellow diamonds are decision gates.** Each one asks: *"Have we secured enough funding to begin the next phase?"* If yes → proceed; if short → loop into a grey hold/descope box and re-pitch.
3. **The bottom row is the funding stack.** Arrows go *upward* into the gate that each funding source unlocks.
4. **Dotted arrows close the loop.** Completing a phase produces deliverables (feasibility studies, legal entity, working pilot) that themselves *unlock the next layer* of funding. This is the engine of the project.
