

Stakeholder Network — Forest-Led Model

Mitsue AI Data Center & Biomass Energy Project

v1.0 · 2026-09-21 · Rob Oudendijk

Very early draft — concept only. Nothing here is decided or agreed. Starting point for discussion, not a proposal to sign. Alternative to the NGO-led model in `mitsue_kanko_collaboration_diagrams`: here the Mitsue Village Forest Association (8-crew forestry cooperative) is the operational hub for logging, replanting and processing, with the NGO delegating day-to-day coordination rather than running it directly.

Network diagram

Legend

Government	NGO / NPO	Company
Forest Team (co-op)	Academia	— solid arrow: planned/structural link · ---- dashed: tentative / unconfirmed

Reading the diagram: liaison runs Village Hall → more trees → NGO; the NGO delegates day-to-day coordination to the Mitsue Village Forest Association (8-crew hub), which in turn supplies fuel-wood to the Operating Company. NAIST's research link goes direct to the Forest Team, not through the NGO. Dashed edges (equipment grants, land-use permits, Mizuho financing, corporate CSR, Sugano pilot site, pro bono legal) are not yet confirmed in writing.

Node detail

Node	Group	Role / status
Village Hall	Government	Formal liaison entry point; grants land/permits to Operating Co
Nara Prefecture	Government	Land-use permits, subsidy — TBD (tentative)
METI / MoE / forestry agency / NEDO / JST	Government	National subsidy sources; forest/RE-type via village, DC/power-type via Operating Co
Project NGO (一般社団法人)	NGO/NPO	Non-distributing legal/financing wrapper; majority owner of Operating Co
more trees	NGO/NPO	Liaison + replanting species/method partner between Village Hall and NGO
Foundations	NGO/NPO	Grant source into NGO — target ¥33M, ¥0 secured to date (see funding flowchart)
Mitsue Village Forest Association	Forest Team	8-crew forestry cooperative; operational hub for logging, replanting, processing under this model
Operating Co (GK/KK)	Company	CHP + AI Data Center operating entity, majority-owned by the NGO
Mizuho Securities	Company	Financing option — undecided (tentative)
Sugano Organic	Company	Exploratory pilot CHP site (tentative)
Corporate partners	Company	Unconfirmed CSR/sponsorship (tentative)
Legal (pro bono)	Company	Linklaters (Watanabe), TMI (Nakano), likely Nishimura & Asahi (Hotta) — all confirmed pro bono, no written engagement letter
NAIST	Academia	Direct research link to the Forest Team (logging/processing); contact via Kubo (CDG), introduced by President Shiozaki — relationship still developing, not yet a formal MOU

This is the forest-team-led alternative to the NGO-led coordination model in [mitsue_kanko_collaboration_diagrams](#). Source: repo docs ([mitsue_kanko_forest_led_diagrams_a3.html](#) panel 4), cross-checked against project notes as of 2026-09-21.
