

Komatsu Reply (7 Oct 2026) — For the Mitsuemori Team

For viewing only — not to be handed over or forwarded.

Background

We asked Komatsu whether Mitsue Village could be considered for a trial of Komatsu Forest's CTL (Cut-To-Length) forestry machinery, as one possible way to ease the forestry labor shortage. A Komatsu HQ contact replied on 7 October 2026.

Nothing is decided yet: no trial, model, purchase or support. Komatsu is still at the stage of gathering information.

Email details

- Received: 7 October 2026, 10:35 (JST)
- From: Hisanori Yagami, Forest and Agriculture Business Division, Komatsu Ltd. HQ
hisanori_yagami@global.komatsu
 - Function: Marketing Development Manager, Komatsu Japan (as of Feb 2025, per a HITRAF article); appears to be the HQ contact for bringing Komatsu Forest machines to Japan.
- To: Rob Oudendijk rob@mitsue.it
- Cc:
 - Peter Hasselryd, VP Marketing & Sales, Komatsu Forest AB peter.hasselryd@komatsuforest.com
 - Hirotaka Adachi hirotaka_adachi@global.komatsu
 - Asako Nakamura asako_nakamura@global.komatsu
 - Shinichi Tokunaga shinichi_tokunaga@global.komatsu
 - Atsushi Saitou atsushi_01_saitou@global.komatsu

Note: the roles of the cc recipients other than Hasselryd are unknown.

Dear Rob Oudendijk,

Please accept my sincere apologies for the delay in responding to you. My name is Yagami, and I work in the Forest and Agriculture Business Division at Komatsu Headquarters. We have reviewed your email and would like to thank you very much for your interest in Komatsu Forest's CTL machinery.

We understand that you are inquiring about the following specific points:

1. The feasibility of a CTL trial
2. Model selection
3. Site slope limits and extraction road widths

However, we cannot provide a definitive answer to these questions at this stage. Therefore, as a first step, could you please provide us with the following information?

1. Background information regarding this project.
2. The relationship between Mitsue Village, Nara Prefecture, and this project.
3. This appears to be a project of significant scale; could you provide a rough schedule for when the AI data center will be completed and when the CTL machines will be required?
4. Regarding the comment, "We saw the 901XC + C93 in action and it looks like a better match for our scale than the 931XC"—where exactly did you see this?
5. You have expressed a desire for a trial in Mitsue Village; are you considering a future purchase, or are you looking for Komatsu to engage in ongoing CSR-related activities?

As a next step, we would like to arrange a Teams meeting or visit the site. We are very interested in this project. We look forward to your reply and appreciate your continued cooperation.

Best regards, Komatsu Ltd. Forest and Agriculture Business Division Hisanori Yagami

Next steps

- We are preparing answers to the five questions with the team (no reply has been sent yet).
- Komatsu proposed a Teams meeting or a site visit. We will share the date once it is set.
- If a machine trial goes ahead, it could help reduce the labor needed for thinning and extraction (fewer people and machines). For now this is only a possibility.
