

Mitsue Forest Supply Chain - What We Currently Have

From forest owners to buyers and the future CHP / AI data center. Green = confirmed, grey dashed = unknown or unconfirmed, blue dashed = future.

Version: v1.1 | Last modified: 2026-09-30

Solid box = confirmed fact
 Dashed grey = unknown / unconfirmed
 Dashed blue = future (not built)
 Dashed arrow = unconfirmed or proposed

Grade split (A 22% / B 54% / C-D 24%) is from a larch study, not Mitsue. Not shown: felling notices (伐採届), 森林経営計画, subsidies and the forest environment tax. Onsen heat cannot be piped from 牛峠工場. Internal working draft.

Open questions

- Village-owned forest (村有林)?** Asked 2026-08-05, no answer.
- Common-use land (財産区・入会)?** No Mitsue record; only Tenkawa confirmed.
- Independent harvester's wood:** his own goes to Misugi market; others reportedly to Sakurai coop. Coop flows unverified.
- How many other independent harvesters?** He estimates 10+. Village asked 2026-09-30.
- Does the coop thin members' forest,** or do owners deal with harvesters directly? Ask Oct 2.
- Reforestation:** 神末 (cherry) and 土屋原 (planned). Who funded and did it?
- Who is the 施業放置林マネージャー** and is there an owners' list or group?
- Onsen wood:** which grades and volumes, and from whom besides the coop?
- The "6-year" contract term** has no source. Only the 3-year 協力隊 term and 5-year machinery loan are documented.
- B-grade destination** (plywood buyer or CHP fuel) sets real CHP fuel volume.
