Questions for Yamaguchi-san

Friday 6 Nov 2026, 12:00, Himeishi-no-Yu / Rob

Thank you for your time. Answer only what you can. Skip anything you prefer not to answer.

1. What stays in the forest after thinning

- After thinning, what stays in the forest (tops, branches, thin trees)?
- Who owns it?
- Could it become chip fuel? (It would not compete with your sales.)

2. Clear-cut and replanting at Kamisue and Tsuchiyahara

- What is planned to be planted?
- Who decides the species?
- Would owners accept broadleaf trees or kiri (paulownia)?

3. Operators

- How many operators are active in Mitsue now?
- Is anyone close to retiring?
- Could anyone take on a trainee?

4. The future of forestry in the village

- How do you see forestry in Mitsue in 10–20 years?
- What is the biggest challenge?

5. Working with outside initiatives

- What would you need to see before working with an outside initiative?
- Could you imagine an adviser role?

6. Update (from Rob)

- Briefly share: the Uda prototype direction and the January NAIST presentation.
- Ask for his honest reaction.
- Nothing is decided yet. Funding is not confirmed.
