Oba-san visit — Fri 6 Nov 2026, 10:30, Village Hall, Industry & Construction Division

Preparatory research only. No contract or partnership exists with the village or the cooperatives.

A. Topics

#	Topic	Notes
A1	How to proceed in the village (advice)	
A2	伐採届 (felling notification) numbers, area, volume; where to get the form	
A3	Owner intent survey: parcel clean-up first, then ~4 years. Confirm: 4 years after completion, or does the clean-up take 4 years?	
A4	Tender for neglected-forest work (reserve ¥18,948,000; Mitsue Forest Coop ¥18.7M; Muro ¥18.8M; Uda ¥18.9M)	
A4a	Open or invitation-only tender?	
A4b	Which cooperatives were invited, and why only forest cooperatives?	
A4c	Was the reserve price published before the bid?	
A4d	Is there a minimum bid price?	
A4e	Can private operators (e.g. Tokuda) bid, and under what conditions?	

B. Questions

#	Question	Notes
B1	Village-wide wood taken out per year: 伐採届 area/volume, clear-fell vs thinning, extracted vs cut-and-leave, incl. non-cooperative and private	
B2	Why is most of the R6–R8 thinning plan cut-and-leave (R8 ~5,800 m³)? Extraction cost, slope, work roads?	
B3	Can cut-and-leave plots switch to extraction (chips)? Subsidy rate and procedure?	
B4	Were R6/R7 carried out? Actual area, volume, extracted vs left?	
B5	Road/work-road access to the plan sites (can trucks get in?)	
B6	Draft plan for R9 onward? Plan table as Excel?	
B7	Owner/implementer of the extraction plots (R8 494–503; R6 352, 359, 372)	
B8	Forest register: sugi area and standing volume by age class	
B9	Typical stumpage price; who receives the log-sale income?	
B10	Clear-cut size limits; may we replant with broadleaf/kiri, and what subsidy per ha; deer-fence subsidy	
B11	Nearby buyers and prices for A and B logs (plywood/pulp)	

Bring

- This sheet, printed
- R6–R8 thinning plan copy and analysis table
- Village forestry data sheet (xlsx)
- Business cards; pen
